Stop roof leaks today!

Save money, time and frustration.

Avoid Expensive and Time Consuming Tear Offs

You don't need to completely tear off your weathered and leaking roof. Recoating saves you on labor costs and landfill expenses without interfering with your normal business operation.

Extend the Life of Your Roof

Innovative silicone technology gives your roof a weather-tight seal that will protect against severe weather, eliminates common sources of leaks and withstands ponding water.

Ideal for Almost Any Roof

Apply over metal roofs, built-up roofing, mineral cap sheet and weathered single ply membranes such as EPDM.

Re-Coating is Responsible

You avoid tear offs which impact landfills tremendously. The finish of silicone roof coatings can help lower your energy costs significantly.

Low Monthly Payments

We have teamed up with Veridian Financing to allow you to get the roof you need at a price you can afford.
